

An AI receptionist that answers your clinic's calls and messages 24/7, books appointments, and follows up with patients — even when you're closed.

THE NICHE

Target Market Dental Clinics	Geography UAE — Dubai, Abu Dhabi, Sharjah	Decision Maker Clinic Owner / Manager
--	---	---

THE PROBLEM

The Pain	The Cost
A patient calls or messages the clinic. No one answers — or they reply hours later. By then the patient has already booked with another clinic down the road.	UAE dental appointments are \$200–\$500 each. Missing just 5 inquiries a week means \$1,000–\$2,500 lost every single week.

THE SOLUTION

AI Receptionist	Answers. Books. Reminds. 24/7.
------------------------	--------------------------------

01

Patient reaches out

Via WhatsApp, phone, website form, or Instagram DM — any channel, any time.

02

AI answers instantly

The receptionist picks up in seconds. No hold music. No missed calls. No voicemail.

03

Qualifies the patient

Asks: new or existing? Which treatment? Preferred day and time?

04

Books the appointment

Checks availability and books directly into Google Calendar. Confirmation sent to patient automatically.

05

Sends reminders

Reduces no-shows with automated WhatsApp reminders before the appointment.

06

Notifies the clinic

Owner or manager gets an instant alert with full patient details.

TECH STACK

n8n (automation)	Claude AI (brain)	Google Calendar	WhatsApp / Web Form	Airtable (CRM)

Hosting & maintenance
Updates & improvements
WhatsApp support
Monthly performance report

1 client / year

\$2,900+

3 clients retainer

\$900 / month

5 clients retainer

\$1,500 / month

OBJECTION HANDLING

Their Objection	Your Answer
<i>"We already have a receptionist."</i>	Sara doesn't replace her. She handles what your receptionist can't — after hours, weekends, and when she's busy with patients inside the clinic.
<i>"We don't miss that many calls."</i>	Most clinics don't track this. One missed call per day at \$200–\$500 per appointment is \$4,000–\$10,000 lost every month.
<i>"How do I know it actually works?"</i>	I can show you a live demo in 10 minutes. You'll see it answer, qualify, and book — in real time. No tech knowledge needed from your side.
<i>"It's too expensive."</i>	One recovered patient appointment covers \$200–\$500. My monthly fee is \$200–\$300. You need just one extra booking per month to break even — everything else is profit.

COLD OUTREACH SCRIPT (WhatsApp / Instagram DM)

Opening line:

Hi [Clinic Name] — quick question about your patient bookings.

Message body:

When a patient calls or messages your clinic after hours — what happens?

Most clinics miss those inquiries. The patient doesn't wait. They call the next clinic on Google Maps.

I set up an AI receptionist for dental clinics in UAE that answers 24/7, books appointments automatically, and sends reminders to reduce no-shows.

Takes 3–5 days to set up. No technical work needed from your side.

Can I show you a 10-minute demo this week?

DAILY ACTION PLAN

Time	Action
Morning — 30 min	Find 10 dental clinics on Google Maps in Dubai or Abu Dhabi. Check if they have a chatbot or AI receptionist. If not — they're a prospect.
Afternoon — 20 min	Send outreach via WhatsApp or Instagram DM using the script above. Keep it short. End with the demo offer.
Evening — 10 min	Follow up with anyone who read but didn't reply. One follow-up doubles your reply rate.
Weekly goal	30 messages sent → 3–5 replies → 1 demo call booked → 1 client closed per month.
