## Insurance

High-volume, high-intent leads. Insurance businesses are drowning in repetitive quote requests and follow-ups — perfect for AI automation.

| Niche                     | Best AI Use Case           | What to Automate                                               |
|---------------------------|----------------------------|----------------------------------------------------------------|
| Life Insurance            | Lead qualification chatbot | Pre-qualify leads, collect age/health data, book advisor calls |
| Health Insurance          | Plan comparison agent      | Answer plan questions, compare coverage, capture contact info  |
| Income Protection         | Follow-up sequences        | Auto follow-up with prospects who requested quotes             |
| Auto/Car Insurance        | Instant quote bot          | Collect car details, give estimate range, book consultation    |
| Funeral Insurance         | Sensitive inquiry handler  | Answer FAQs, collect info discreetly, connect to agent         |
| Private Medical Insurance | Renewal reminder agent     | Notify clients of upcoming renewals, upsell upgrades           |

## Outreach Angle for Insurance

*"Your agents are spending hours every week answering the same questions about premiums and coverage. I built an AI that handles that 24/7 so your team only talks to qualified, ready-to-buy leads."*

## Pricing Suggestion

- Setup: **\$1,000–\$1,500**
- Monthly retainer: **\$300–\$500**

## Financial Services

High-trust niche. Clients have lots of questions before committing. AI can handle the education phase and pre-qualification so advisors only speak to serious leads.

| Niche                    | Best AI Use Case            | What to Automate                                            |
|--------------------------|-----------------------------|-------------------------------------------------------------|
| Mortgages                | Pre-qualification bot       | Collect income, deposit, credit score — book advisor call   |
| Auto/Car Loans & Finance | Loan calculator agent       | Estimate monthly payments, capture lead, book appointment   |
| Compensation / Claims    | Claim eligibility checker   | Ask qualifying questions, assess eligibility, book callback |
| Secured Loans            | Lead intake agent           | Collect asset info, loan amount needed, pass to advisor     |
| Equity Release           | Educational chatbot         | Explain the process, answer FAQs, qualify homeowners        |
| Pension Transfer         | Compliance-friendly FAQ bot | Handle generic questions, flag complex ones to advisor      |
| Debt Consolidation       | Debt calculator agent       | Estimate savings from consolidation, capture warm leads     |
| Debt Finance             | Repayment planner bot       | Help clients understand options, collect contact info       |

| Niche       | Best AI Use Case     | What to Automate                                            |
|-------------|----------------------|-------------------------------------------------------------|
| Tax Rebates | Eligibility screener | Ask qualifying questions, estimate rebate amount, book call |

## Outreach Angle for Financial Services

*"Most people who visit a mortgage broker's website leave without ever making contact. I built an AI agent that starts the conversation instantly, pre-qualifies them, and books them in — while you sleep."*

## Pricing Suggestion

- Setup: **\$1,500–\$2,500**
- Monthly retainer: **\$400–\$700**

## Technology

Tech businesses need AI too. IT support teams deal with the same tickets over and over — a huge automation opportunity.

| Niche                         | Best AI Use Case       | What to Automate                                                           |
|-------------------------------|------------------------|----------------------------------------------------------------------------|
| IT Support & Services         | Tier-1 support chatbot | Handle common issues (password reset, connectivity), escalate complex ones |
| Software Development Agencies | Project intake agent   | Collect project brief, budget, timeline — qualify before discovery call    |

## Outreach Angle for Tech

*"Your support team is answering the same 20 questions every day. I can automate 60–70% of that with an AI agent so your engineers focus on actual work."*

## Pricing Suggestion

- Setup: **\$2,000–\$5,000**
- Monthly retainer: **\$500–\$1,200**

## Home Services

Massive, fragmented market. Most home service businesses have no automation at all — they're the easiest to sell to.

| Niche                         | Best AI Use Case                | What to Automate                                              |
|-------------------------------|---------------------------------|---------------------------------------------------------------|
| Solar                         | Lead qualifier + ROI calculator | Estimate savings based on location/bill, qualify, book survey |
| Home Security Systems         | Demo booking bot                | Answer product questions, book a free home assessment         |
| Home Improvement / Renovation | Quote intake agent              | Collect project scope, photos, timeline — book estimate visit |
| Real Estate                   | Lead follow-up agent            | Follow up with new inquiries instantly, book viewings         |
| Home Cleaning Services        | Recurring booking bot           | Handle bookings, frequency preferences, cancellations         |

### Outreach Angle for Home Services

*"Every time someone visits your website after hours and can't get an answer, they call your competitor. I built an AI that responds instantly and books them in — 24/7."*

### Pricing Suggestion

- Setup: **\$800–\$1,500**
- Monthly retainer: **\$200–\$400**

## Automotive

High-ticket purchases with long decision cycles. AI can keep prospects warm and move them through the funnel automatically.

| Niche     | Best AI Use Case       | What to Automate                                                 |
|-----------|------------------------|------------------------------------------------------------------|
| Car Sales | Test drive booking bot | Answer model/spec questions, check availability, book test drive |

| Niche                | Best AI Use Case      | What to Automate                                       |
|----------------------|-----------------------|--------------------------------------------------------|
| Auto Repair Services | Service booking agent | Diagnose issue via chat, book drop-off, send reminders |

## Outreach Angle for Automotive

*"Car buyers research for weeks before visiting a dealership. Your AI agent can be talking to them the whole time — answering questions and booking test drives while your sales team focuses on closing."*

## Pricing Suggestion

- Setup: **\$1,000–\$2,000**
- Monthly retainer: **\$300–\$500**

## Beauty & Wellness

One of the easiest niches to close. Booking is the #1 pain point and AI solves it perfectly.

| Niche                          | Best AI Use Case          | What to Automate                                         |
|--------------------------------|---------------------------|----------------------------------------------------------|
| Hot Tubs & Spa Installations   | Product advisor bot       | Help customers choose models, book showroom visit        |
| Beauty Salons                  | Appointment booking agent | Handle bookings, cancellations, reminders, upsells       |
| Fitness Centers                | Membership inquiry bot    | Answer class questions, offer trial, collect signup info |
| Health & Wellness Retreats     | Retreat advisor agent     | Match clients to retreats, handle FAQs, collect deposits |
| Nutritionists / Health Coaches | Discovery call booker     | Pre-qualify clients with health goals, book consultation |

## Outreach Angle for Beauty & Wellness

*"Your front desk spends half the day booking appointments that could be automated. I can set up an AI that handles all of that so your staff focuses on*

| *what they do best."*

## Pricing Suggestion

- Setup: **\$700–\$1,200**
- Monthly retainer: **\$200–\$350**

## Education & Training

| Growing fast. Online education businesses need automation to handle high volumes of inquiries and convert free leads into paid students.

| Niche                        | Best AI Use Case          | What to Automate                                                            |
|------------------------------|---------------------------|-----------------------------------------------------------------------------|
| Online Education / Coaching  | Course recommendation bot | Match prospects to the right course, handle payment FAQs                    |
| University Placements        | Application guide agent   | Walk students through the process, collect documents, answer eligibility Qs |
| Personal Development Coaches | Discovery call funnel     | Qualify coaching leads, handle objections, book strategy call               |

## Outreach Angle for Education

| *"Most people who visit a coaching website have questions before they're ready to buy. An AI agent that answers those questions instantly — and books discovery calls automatically — changes everything."*

## Pricing Suggestion

- Setup: **\$1,000–\$2,000**
- Monthly retainer: **\$300–\$500**

## Retail & E-Commerce

| High volume, high urgency. E-com stores lose customers every day to slow or missing support.

| Niche             | Best AI Use Case                      | What to Automate                                         |
|-------------------|---------------------------------------|----------------------------------------------------------|
| E-Commerce Stores | Customer support + order tracking bot | Handle order status, returns, product questions, refunds |

## Outreach Angle for E-Commerce

*"Your store is losing sales every day from unanswered questions at checkout. I can deploy an AI that answers instantly, handles returns, and recovers abandoned carts — automatically."*

## Pricing Suggestion

- Setup: **\$1,200–\$2,500**
- Monthly retainer: **\$400–\$800**

## Travel & Events

Inquiry-heavy businesses with lots of repetitive questions — ideal candidates for chatbots.

| Niche                             | Best AI Use Case     | What to Automate                                                    |
|-----------------------------------|----------------------|---------------------------------------------------------------------|
| Travel Agencies / Tour Operators  | Trip planner chatbot | Ask budget/destination/dates, recommend packages, book consultation |
| Event Planning / Wedding Services | Inquiry intake agent | Collect event date, guest count, budget — book discovery call       |

## Outreach Angle for Travel & Events

*"Every couple planning a wedding has 50 questions before they book. An AI agent that handles all of those instantly — and books the call — means you never lose a warm lead again."*

## Pricing Suggestion

- Setup: **\$800–\$1,500**
- Monthly retainer: **\$250–\$450**

## Pet Services

Underserved niche with loyal, repeat customers. Easy to close, easy to automate.

| Niche                     | Best AI Use Case           | What to Automate                                       |
|---------------------------|----------------------------|--------------------------------------------------------|
| Pet Sitting / Dog Walking | Booking & availability bot | Check availability, collect pet info, confirm bookings |

### Outreach Angle for Pet Services

*"Pet owners want to book fast and trust who they're leaving their dog with. An AI that handles bookings and answers questions about your service builds that trust instantly."*

### Pricing Suggestion

- Setup: **\$500–\$800**
- Monthly retainer: **\$150–\$250**

## Legal & Financial Planning

High-value clients, high-trust decisions. AI handles the top of funnel so attorneys and advisors only speak to qualified leads.

| Niche                                  | Best AI Use Case          | What to Automate                                                |
|----------------------------------------|---------------------------|-----------------------------------------------------------------|
| Personal Injury Lawyers                | Case intake screener      | Ask accident details, assess viability, book free consultation  |
| Family Law Attorneys                   | Sensitive inquiry handler | Handle FAQs, collect case basics, route to right attorney       |
| Wealth Management / Financial Planning | Client onboarding bot     | Collect financial goals, risk tolerance, book advisor meeting   |
| Class Action                           | Claim eligibility bot     | Screen potential plaintiffs, collect info, flag qualified leads |

### Outreach Angle for Legal

*"Your intake team is spending hours screening calls that go nowhere. I built an AI that handles the first conversation, qualifies the case, and only sends you the serious ones."*

### Pricing Suggestion

- Setup: **\$1,500–\$3,000**
- Monthly retainer: **\$500–\$1,000**

## Digital Marketing & Business Services

Selling to other agencies = selling to people who already understand the value of automation. High-ticket, easy to upsell.

| Niche                      | Best AI Use Case                    | What to Automate                                                       |
|----------------------------|-------------------------------------|------------------------------------------------------------------------|
| Digital Marketing Agencies | Client reporting bot + lead nurture | Auto-send performance reports, follow up with leads, handle onboarding |

### Outreach Angle for Agencies

*"You're helping clients grow — but your own agency's lead follow-up is still manual. I can build you an AI system that qualifies inbound leads and books discovery calls on autopilot."*

### Pricing Suggestion

- Setup: **\$2,000–\$5,000**
- Monthly retainer: **\$600–\$1,500**

## How to Pick Your First Niche

▼ Step 1 — Ask yourself these 3 questions

1. **Do I have any experience or interest in this industry?** Familiarity = trust = faster closes.

2. **Are there lots of local businesses in this niche in my city?** Volume matters when prospecting.
3. **Are they booking appointments or handling inquiries manually?** That's your entry point.

#### ▼ Step 2 — Validate on Google Maps

Search your niche on Google Maps. Open 10 websites. If most of them have no live chat, no booking bot, and just a phone number — you've found your market.

#### ▼ Step 3 — Start with ONE, go deep

Don't jump between niches. Pick one, build one demo chatbot, and send it to 30 businesses. Iterate based on responses. You only need 3–5 clients to hit \$5K/month.

#### ▼ Which niche makes the most money?

Financial Services and Legal have the highest deal sizes (\$1,500–\$5,000 setup). But Beauty & Wellness and Home Services are the easiest to close if you're just starting. Start easy, then go up-market.

---

## Quick-Start Checklist

- ☐ Pick ONE niche from this list
- ☐ Find 20 businesses on Google Maps with no chatbot
- ☐ Copy one business's services page
- ☐ Generate chatbot prompt using ChatGPT
- ☐ Build demo in Voiceflow or Relevance AI
- ☐ Record a Loom demo
- ☐ Send outreach to 20 businesses using the 3-part email formula
- ☐ Follow up after 3 days
- ☐ Close your first client

☐ Duplicate and resell to 4 more in same niche

## The Revenue Math

| Clients | Avg Setup Fee | Monthly Retainer | Monthly Total |
|---------|---------------|------------------|---------------|
| 1       | \$1,000       | \$300            | \$1,300       |
| 3       | \$3,000       | \$900            | \$3,900       |
| 5       | \$5,000       | \$1,500          | \$6,500       |
| 10      | \$10,000      | \$3,000          | \$13,000      |

 **The retainer is the real business.** Build once, charge monthly forever.

*Built for the AI For Profit community. Pick your niche. Build your demo. Get paid.*
